Mytunes Validation Part 2

MyTunes in the same condition as when Part 1 ended. Add more songs if needed.
Same procedure. Screen capture of all tests.

Part 2 due August 13, 5pm

Part 3 (optional) will be released Sunday August 11 and Due Aug 15, 10pm

No Playlists

- Show the "Playlist" panel with no playlists in it (1)

- Click on Library in the Playlist panel (2) (nothing changes)

- Go to File, then Create Playlist. Name it "One" (3)

- The One appears under Playlists (4)

- The empty playlist One appears in the main window (4) (the window usually showing the Library

- All 6 IDTag required fields (including file name) show in Playlist One window (main window) with no songs (5)

- Click on Library in the left panel. The Library view is restored. (6)

Open Playlist in New Window

- Click on playlist One – it shows in the main window replacing the Library

- Right click on One in the Playlist panel. Select "Open in new window" (7)

- Playlist One opens in new window (8)

- Library is displayed in primary (main) window (9)

Add Songs to Playlist

- Select a song in the Library and right click. The popup menu now has "Add to playlist" entry. Mouse over this entry and all current playlists appear. (10)

- Select One from the playlists list in the popup and the song is added to playlist One (11)

- The playlist window from (8) is updated with the newly added song (12)

DND to Playlist

- From outside MyTunes, drag a new song not in the library onto the playlist One. The song is added to the playlist (13)

- The song is added to the Library (14) (and clearly visible in the Library)

- Drag the same song again. It is added a second time to the playlist One (15) but not to the Library (16)

- Drag some different song from the Library window to playlist One. The song is added to One. (17)

- Drag two or more songs from the Library to One. The songs are added to One. (18)

Playlist Controls

- Play the first song in the One. Skip (next) to the next song. It plays. (19) Stop playing. Click Previous in One's control. Previous song plays. (20). Stop playing.

- Select a song from the Library and play it.

  - Volume control is showing (21)

  - Slide Volume control full right – volume clearly up (22)

  - Slide Volume control full left – volume is muted (23)

  - Play and song from the playlist One. Its volume is nominal (the default start volume > 0) (24).

- Close the window with the playlist One. Song stops playing.

- Right click One in the Playlist panel. Delete One. (25)

- End of Part 2
